

U.S. Application No. 09/807,962

2-AMINO-THIAZOLE DERIVATIVES, PROCESS FOR THEIR PREPARATION,
AND THEIR USE AS ANTITUMOR AGENTS

ABSTRACT OF THE INVENTION

Compounds which are 2-amino-1,3-thiazole derivatives of formula (I)

wherein R is a halogen atom, a nitro group, an optionally substituted amino group or it is a group, optionally further substituted, selected from i) straight or branched C₁-C₈ alkyl, C₂-C₆ alkenyl or C₂-C₆ alkynyl; ii) C₃-C₆ cycloalkyl; iii) aryl or arylalkyl with from 1 to 8 carbon atoms within the straight or branched alkyl chain; R₁ is an optionally further substituted group selected from: i) straight or branched C₁-C₈ alkyl or C₂-C₆ alkenyl; ii) 3 to 6 membered carbocycle or 5 to 7 membered heterocycle ring; iii) aryl or arylcarbonyl; iv) arylalkyl with from 1 to 8 carbon atoms within the straight or branched alkyl chain; v) arylalkenyl with from 2 to 6 carbon atoms within the straight or branched alkenyl chain; vi) an optionally protected amino acid residue; or a pharmaceutically acceptable salt thereof; are useful for treating cell proliferative disorders associated with an altered cell dependent kinase activity.
